

EXTREME CONCEPTS

2012 A trailers – 2 off

Body

4.8m long x 1.15 high

York disc brake Axles on steel 10 stud 285 PCD (American truck size)

Not unitised . Long stud so can upgrade to Aluminium if required.

6 mm Hardox

2 kingpin positions so it can go up front if required.

Dual spool control valve for later addition of lid if required.

Rubber seal along inside of door to prevent fine product leakage.

Set up with priority valves so door opens first for washing out when empty.

Curved where wall meets floor for less product sticking on ends

250Kn rated turntable / ballrace to suit quad application

Lengths

9.2 extreme axle spacings with body set forward to throw weight onto tri dolly.

This unit , coupled with the two extreme concepts units advertised will go under 36.5 metres with

All tandem drive trucks including Titan , 908 , Constellation and others.

Tri drive Titan , 908 , even tri drive twin steer 108 , Scania or any others.

It would pay to check with us first and supply dimension from turntable to bulbar on the specific unit you have.
